

203

TIRE MOUNTING LUBRICANT

Super advantageous - You save up to 50% in working hours compared to traditional mounting.

Superior passing between tire & rim.

Superior protection - contains rust inhibitors to protect the rims against corrosion.

203

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 203 is characterized by especially selected penetrating which protect both the natural and synthetic rubber components.

ORION 203 is easy to put on and easy to remove. Demands no special preparation and is entirely soluble in water so that remains can be washed away.

ORION 203 contains no soap or silicone and is safe in use for all types of tires.

Orion 203 offers superior passing between tire and rim so that a good grip is insured, even in applications with low air pressure.

ORION 203 is developed in the lab under strict conditions to insure a constant high quality.

Typical applications:

Developed especially for all tire assembly applications, including for large tractors, freight carriages, vehicles and material of each type.

Especially for use in surroundings with high air humidity where wheel rims will rust easily and the assembly of tires extremely difficult is.
