LUBRICANTS

295

SUPER MULTIFUNCTIONAL DIESEL ADDITIVE

Outstanding performance in fuel injector cleanliness.

Contains superior lubricity component for fuel pump wear prevention.

Premium anti-corrosion performance.

Anti-foam properties for faster and easier refueling.

LUBRICANTS

ADVANTAGES

ORION 295 is an advanced additive package formulated to provide improved performance and added protection of diesel engines.

ORION 295 contains superior detergents and inhibitors to ensure cleanliness of injectors and upper cylinder region as well as corrosion protection through the entire fuel system.

With today's low sulphur diesel **ORION 295's** lubricating superiority is essential in fuel pump and injector protection.

ORION 295 increases cetane number by 2 to 3, together with benefits to emissions, easier startup and reduced noise.

Due to **ORION 295's** high anti-foam properties refueling is faster and easier.

Can be used where catalytic convertors are fitted.

Typical applications:

All diesel engines, both direct and indirect injection
