

52

CORROSION PROTECTION GREASE

Provides superior corrosion protection of lubricated parts.

Excellent water resistance and “stay put” properties even under water

Has wide temperature range and is extremely shear stable.

Exceptional load carrying capacity, reducing wear.

52

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 52 is specially formulated to provide superior lubrication and protection to equipment operating in corrosive environments.

With high performance characteristics over a wide temperature range (-30°C to +180°C) **ORION 52** is extremely versatile.

Having a higher density than water **ORION 52** stays in place when applied in submerged applications.

ORION 52 has exceptional anti wear properties and shear stability, greatly extending component life while reducing grease consumption.

Typical applications:

Offshore industry - Fishing and shipping vessels
Chemical plants - Paper processing industry
Abattoirs - Dredging equipment
Water treatment - Bottling plants
