LUBRICANTS

540

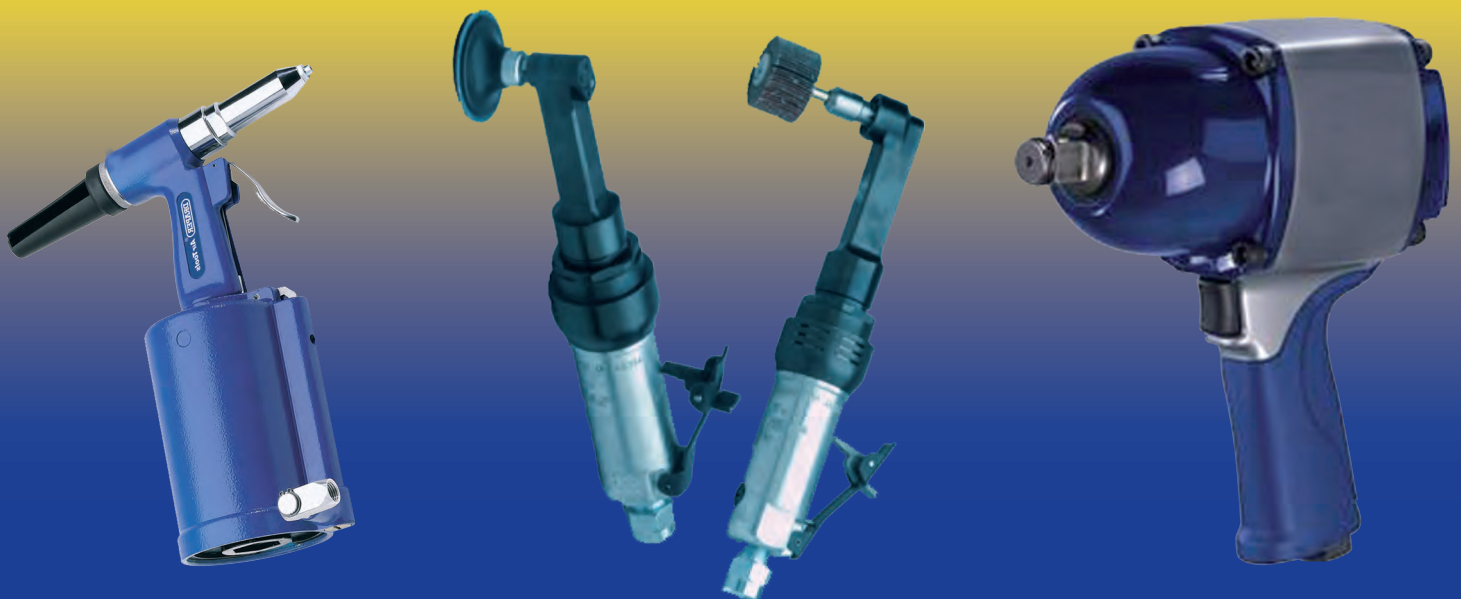

HIGH PERFORMANCE AIR-LINE LUBRICANT

Formulated to both lubricate and protect equipment and tools

Prevents corrosion forming in the air-line.

Improves sealing, increasing efficiency of tools and equipment.

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 540 is an advanced air line lubricant formulated for use in the food, beverage, pharmaceutical processing and packaging equipment. **ORION 540** will inhibit corrosion forming in the airline, rust particles follow the air stream into the equipment causing excessive wear, block filters and result in costly repairs.

ORION 540 has exceptional lubrication properties, reducing wear and extending the service life of air operated tools and equipment.

ORION 540 improves efficiency and extends the service life of air operated equipment, reducing costs. **ORION 540** should be applied into the airline system, if not fitted apply a few drops twice daily directly into the air tool.

Typical applications:

Garage equipment - Tyre fitting equipment
Air operated tools and equipment
Hand operated air tool
