

Orion[®] 
LUBRICANTS

570

MULTI-GRADE HYDRAULIC OIL

Ideal for wide operating temperature ranges.

Excellent anti foam and shear stable viscosity for high efficiency operation.

Formulated for exceptionally long life.

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 570 is a highly refined multigrade oil designed for today's hydraulic systems.

ORION 570 has high water separation with excellent oxidation and corrosion inhibitors protecting internal components from rust and sludge build up.

Stable viscosity and anti foaming properties ensure continued power transfer efficiently during extended periods of operation.

ORION 570 is designed to provide superior lubrication especially for today's close tolerance systems.

ORION 570 provides highly efficient power transfer, reducing energy costs and virtually eliminating "mid day" fade.

Typical applications:

Hydraulic equipment

Enclosed gear systems requiring mild EP additives. Especially suited to restricted volume systems where high heat and foaming are encountered.
