

580

SUPER CHAIN & SLIDEWAY LUBRICANT

Superior lubrication qualities retained even under wet conditions.

High oxidation and corrosion resistance protects metal surfaces.

Low friction even under high loads allow correct machine tool operation.

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 580 is a superb chain and slideway lubricant made from highly refined base oils and selected extreme pressure additives.

ORION 580 reduces metal to metal contact preventing scouring and premature wear.

ORION 580 will not fling off or migrate from load bearing surface reducing friction and oil consumption.

ORION 580 has excellent oil oxidation resistance and provides superior corrosion protection even under water wash conditions for longer periods.

ORION 580 is formulated to provide longer chain and component life, lowering maintenance costs and reduce down time increasing operating profit.

Typical applications:

Conveyor chains - Printing press chains
Lathe slideways - Fork lift chains
All slow to medium speed chains
