

600

UNIVERSAL MACHINE & HYDRAULIC OIL

Excellent anti wear and anti rust properties for maximum protection.

Extremely stable viscosity and non foaming provides min power loss.

Formulated for long drain intervals and cost effectiveness.

600

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 600 is a versatile oil for multi-purpose lubrication and hydraulic applications.

ORION 600 includes special anti wear additives and anti oxidants in its chemistry to provide maximum protection of lubricated parts.

Stable viscosity and anti foaming properties ensure continued power transfer effectiveness during extended periods of operation.

ORION 600 will not migrate from contact areas under working conditions or fling off.

ORION 600 has high water separation ability and corrosion inhibitors protecting vital machinery components from rust.

Typical applications:

Hydraulic equipment - Circulating lubrication systems
Printing presses - Lathes and machining equipment
Way lubrication - Enclosed chain drives
Vacuum compressors - Electric motors
