

610

HIGH PERFORMANCE COMPRESSOR OIL

Excellent resistance to oxidation and deposit formation.

High load carrying and anti-wear characteristics.

Ready separation from water.

610

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 610 increases valve cleaning intervals due to ultra low deposit formation.

ORION 610 reduces ring and cylinder wear due to excellent rust protection and high load carrying characteristics. Stable viscosity and anti foaming properties ensure efficient cooling and lower oil consumption.

ORION 610 has long high resistance to oxidation allowing extended service life.

With **ORION 610** longer oil life, lower maintenance costs and reduced down time all lead to increased operating profit.

Typical applications:

Reciprocating Compressors - Rotay type Compressors
Vacuum pumps - Single and multi stage types
As crankcase oil in crosshead type reciprocating
compressors
Exceeds DIN 51506 VDL requirements
