

62

## SUPER HIGH SPEED BEARING GREASE

Provides excellent protection at extremely high revolutions (DN Factor 1,200,000).

Protects against corrosion in damp or humid environments

Special anti-wear additives increase bearing life.

# 62

**Orion**<sup>®</sup>   
LUBRICANTS

## ADVANTAGES

**ORION 62** is specially formulated to provide superior lubrication in high speed bearings.

With high oxidation resistance and ability to stay in place at extremely high speeds, **ORION 62** extends lubrication intervals

In many cases **ORION 62** will replace oil mist systems providing a cleaner more economical solution.

**ORION 62** provides excellent corrosion protection and is suited to conditions where moisture is encountered.

**ORION 62** with its ability to seal out contaminants and long lasting "stay put" quality make it a very economical lubricant.

## Typical applications:

High speed spindles on CNC machines

Textile spinning machines

Wood turning equipment - All high speed bearings

Where low friction is a priority such as  
electronic controlled equipment and radar
