

# 75

## UNIVERSAL FOOD MACHINERY GREASE

Fully synthetic, one product lubricates almost all food safe applications.

Exceptional water resistance and corrosion protection.

Has an extremely wide temperature range,  
completely stable from  $-50^{\circ}\text{C}$  to  $+180^{\circ}\text{C}$

H1 REG NR: 135666

# 75

**Orion**<sup>®</sup>   
LUBRICANTS

## ADVANTAGES

**ORION 75** is designed to fill most application needs met in the food industry, friction and anti-friction bearings and sliding surfaces.

**ORION 75** withstands wide temperature variations (-50°C to + 180°C), suitable for freezer and high heat applications.

**ORION 75** displays exceptional water resistance and resistance to cleaning chemicals, protecting machinery from damaging corrosion and reducing grease consumption.

The high load carrying ability and anti wear properties ensure prolonged component life.

**ORION 75** is produced using highest purity synthetics ensuring maximum performance and economy.

## Typical applications:

Fruit packing equipment - Food processing machinery  
Beverage production plants - Bottle cleaning plants  
Dairy equipment - Fish handling equipment  
Poultry handling and abattoirs - Hospital equipment
