

880

DRIVE CHAIN & HYDRAULIC FLUID

Formulated to provide maximum power transfer through drive systems and hydraulics.

Provides excellent low temperature properties for unsurpassed cold start protection.

Designed to provide exceptional performance for extended drain periods.

880

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 880 is an extremely versatile formulation providing exceptional performance and protection in transmissions, wet brakes, power take offs, final drives, hydraulics, convertors, and more.

The non foaming, stable viscosity properties and high oxidation resistance of **ORION 880** ensures min power loss through hydraulics and convertors for extended periods, even under arderous conditions. **ORION 880** lubricates and protects gears, clutch systems, drive chains and components.

ORION 880 allows machinery to operate with greater efficiency for extended periods, reducing service and maintenance costs while improving output.

Typical applications:

Recommended for use in:

All types of both on and off road vehicles and equipment:
Manual transmissions, Hydraulics, Wet brakes, Convertors,
Power take offs, Industrial transmissions and many more...

Not for use in automatic transmissions or engine crankcases
