SUPER EP BEARING AND CHASSIS GREASE

Excellent performance in chassis, anti friction and friction bearings.

High resistance to squeeze-out and thinning.

Forms an outer seal that prevents contaminants and dust entering vital areas.

Good moisture and acid resistance protects against corrosion.

Orion[®] 
LUBRICANTS

ADVANTAGES

ORION 97 performs with excellent results anti-friction bearings, friction bearings, bolt and bushing applications and chassis.

ORION 97 has good water and acid resistance which protects vital components in damp or aggressive environments.

Special additives in **ORION 97** reduce friction lowering temperatures and wear.

ORION 97 resists thinning and pounding out even under continuous high loads where ordinary grease would lose consistency and run.

ORION 97 with its ability to seal out contaminants and long lasting "stay put" quality make it a very economical lubricant.

Typical applications:

Farm machinery - Earth moving equipment
Construction equipment - All round industrial greasing
Cement and brick works - Truck and vehicle chassis
Parks and gardens equipment
Road sweeping equipment
